Understanding the Energy Scores

Each energy has a maximum score of 108. A score of 54 or more indicates our preference to using that energy. A score of less than 54 indicates your reluctance to using that energy.

The farther the bar moves to the right the more comfortable it is to use that energy. The farther the bar moves to the left the more difficult it is to use that energy.

Energy Levels **Yellow: 86** **Red: 51** **Blue: 58** **Green: 34**

Interest Preference Indicator Graphs

As with all preferences, by keeping the **ENCOURAGER** connected to the conversation, three things will occur:

- They will desire to continue to listen.
- They will continue to raise their level of trust in what you are communicating.
- They will then retain the highest level of information possible.

When they disconnect, one or all of these things will cease even though the conversation continues.

Therefore:

“When communicating with others you must keep them connected long enough to build a bond of trust where they are willing to let you influence them.”
